Who are we?

WE have been in business since 2008.

WE are a UK-based software development company and we work with organisations ranging in scale from local SMEs to global PLCs.

WE are experts at delivering bespoke systems which leverage open-source software that help companies and organisations maximise efficiency.

Organisational members of the Drupal Association

ISO 9001 certified since August 2013

Our team

WE are a passionate team made up of six dedicated professionals: two Drupal developers, two designers and two project managers, each with over 15 years experience in their field.

WE know that having a compact and agile team continuously working together allows us to ensure customer requirements are not diluted or lost through the triage of a large team.

Investors in People accredited since November 2012

What do we do?

WE provide bespoke software development, including:

Multilingual global websites

Membership platforms

Claim management systems

Online community platforms

Compliance platforms

Teacher appraisal systems

Online learning platforms

Workflow systems

Our goals

WE work with clients who have identified room for improvement within their processes. Automating tasks that are mundane, repetitive and error prone is what we do best.

Our goal is to deliver a system that can take care of these tasks; avoiding mistakes, improving the service offering and putting staff members to better use.

Who we've worked with

The IB's mission has been built on a cornerstone of creating a better world through education.

The Royal Mint is the world's leading export mint, making coins and medals for an average of 60 countries every year.

Equiniti is an intelligent provider of sophisticated financial technology, administration, processing and payments.

POBL are group of companies offering great homes, care and support that make a difference to people's lives.

GAIN's purpose is to improve nutrition outcomes by improving the consumption of nutritious and safe food for all people.

Cardiff University is an ambitious, innovative university ranked 5th in the UK within the Research Excellence Framework

Estyn is Her Majesty's Inspectorate of Education and Training in Wales that inspects quality and standards.

The Aga Khan Academies are a network of schools being established by His Highness the Aga Khan across Asia, Africa, the Middle East and Europe.

Case study

Client background

Haac offer a comprehensive portfolio of I.T. services to insurance companies, businesses, educational establishments and private owners. They are directly appointed by over twenty leading insurance companies within the UK.

Deliverables

WE created a claim management system which offered the following services:

- Logging and tracking of claims.
- Claim reports for Haac and their clients.
- Claim reminders and alerts.
- Claim approval process and audit trail.

Case study

Client background

Equiniti is an intelligent provider of sophisticated financial technology, administration, processing and payments.

Following the acquisition of Selftrade, Equiniti needed a secure scalable web portal that would satisfy the needs of the Selftrade base.

Deliverables

WE created the Selftrade web portal which offered the following services:

- Secure integration with EQXanite share dealing service.
- Smooth integration with information & data partners.
- Satisfy compliance by ensuring a publishing workflow.
- Provide a fresh look and feel to the site.
- Connect with the existing Selftrade community and develop the relationship.

Case study

Client background

The **Aga Khan Academies** are a network of schools being established by His Highness the Aga Khan in countries across South and Central Asia, Africa, the Middle East and Europe.

They carry out an annual teacher review process which collects data on teachers based in each of the academies for analysis and quality control purposes.

Deliverables

WE created an online teacher appraisal system which offered the following functionality:

- Scalable infrastructure for existing & future academies.
- Secure data entry worldwide.
- Hierarchical data analysis.
- Role based user access.
- On demand reporting with export facility.

Case study

Client background

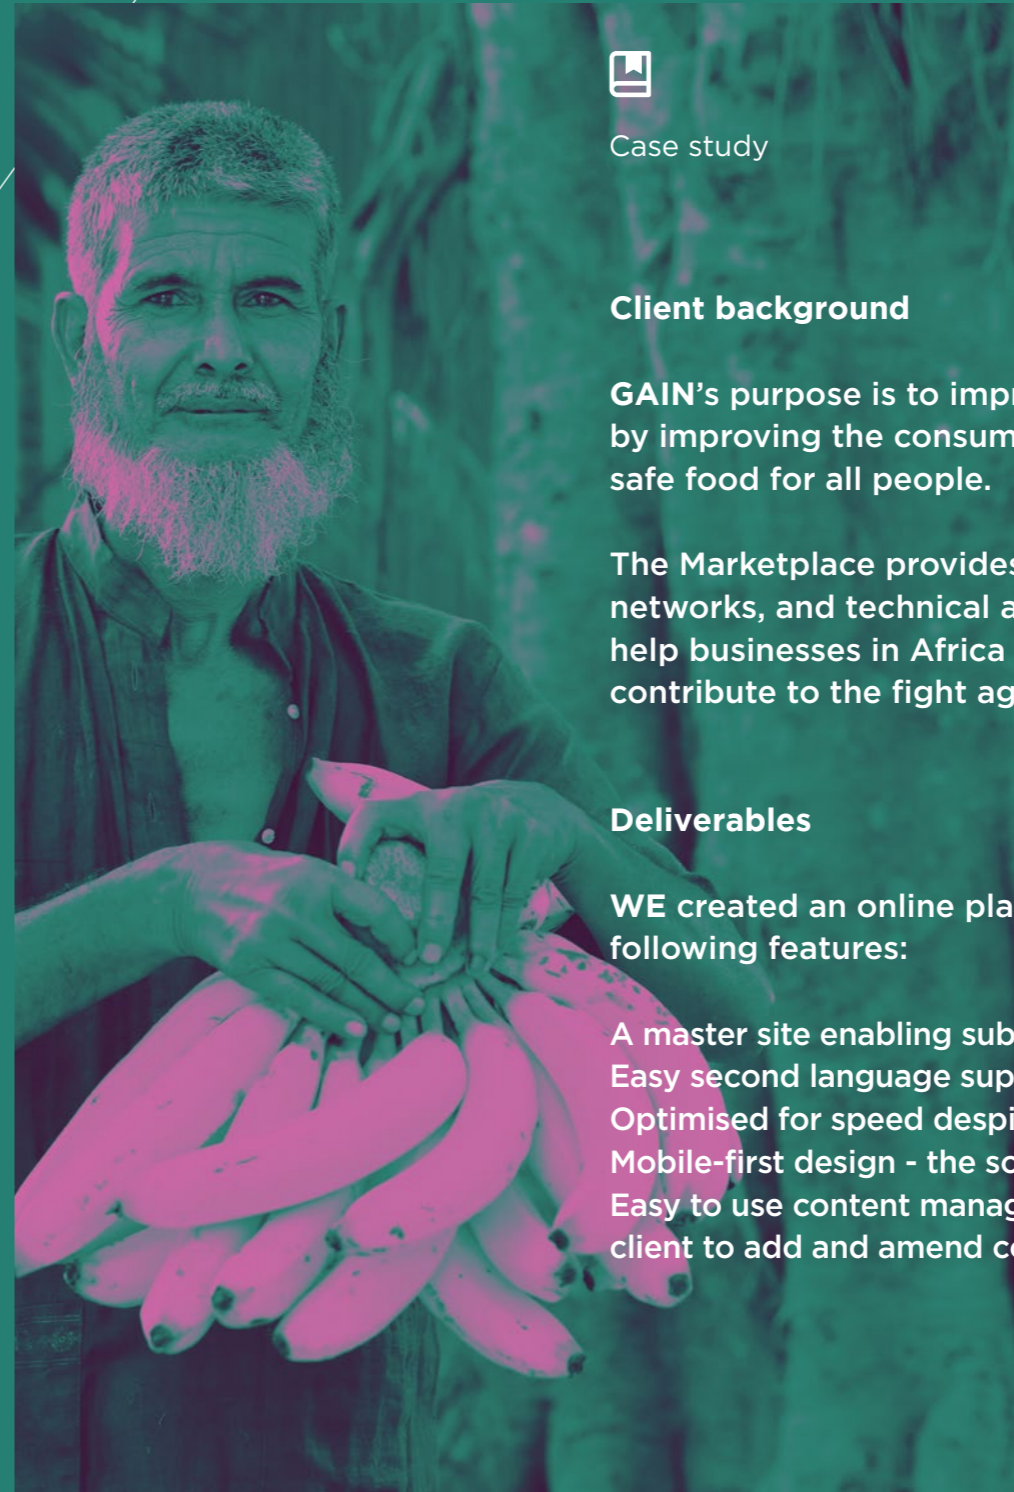

GAIN's purpose is to improve nutrition outcomes by improving the consumption of nutritious and safe food for all people.

The Marketplace provides access to knowledge, networks, and technical and financial assistance to help businesses in Africa use local agriculture to contribute to the fight against malnutrition.

Deliverables

WE created an online platform with the following features:

- A master site enabling subsites to be quickly created.
- Easy second language support for bilingual capability.
- Optimised for speed despite poor internet connection.
- Mobile-first design - the source for most visitors.
- Easy to use content management system allowing client to add and amend content.
